PROJECTS

Smart Traffic Control System (IoT Based)

📅 2025 - 10/2025 📍 KIET GROUP OF INSTITUTION

This system detects vehicle density at intersections and adjusts signal timing automatically, reducing congestion and saving time. It demonstrates how IoT can make city infrastructure smarter and more efficient.

Technologies used: ESP32, Ultrasonic Sensor, LED and BreadBoard.

FinTracker : MultiPurpose Finance Tracker (Web Based)

📅 02/2023 - 03/2023 📍 KIET GROUP OF INSTITUTION

FinTracker is a modern web-based financial management system designed to help people track and manage their money easily. It brings together multiple financial features in one simple dashboard. The main idea is that many people and businesses struggle to keep their financial records organized

Technologies used: HTML, CSS, React JS, Gemini AI and GitHub.
